

PRODUCTION Ware™

System Profile

Choose the Productivity Tools You Need to Meet All of Your Production Goals

ProductionWare lets you tailor a system to meet your business needs of today and tomorrow.

Plant Floor Productivity

Manufacturing and production personnel are focused on meeting demand with high quality product. The goal in the plant is to keep the lines running as efficiently as possible while shipping zero defects.

ProductionWare gives you the tools you need to ship more products faster while decreasing costs and increasing quality.

Production Controller is the engine that drives your plant floor processes and collects your production data in real-time.

Line Manager is the Windows-based system administration engine for your system.

And Information Manager gives you the information-management and analysis tools you need for product and process improvement.

Integrated Capabilities

ProductionWare integrates all of its functions to deliver a powerful, versatile system. The heart-and-soul of the system is a central database housed with accurate, timely data and capable of delivering the information you need where you need it and when you need it.

The database provides a window to your business systems and enables the flow of information throughout your facility and/or your organization. This information flow empowers you to make informed business decisions about your operations at the cell,

line, plant or enterprise level.

Tailored Flexibility

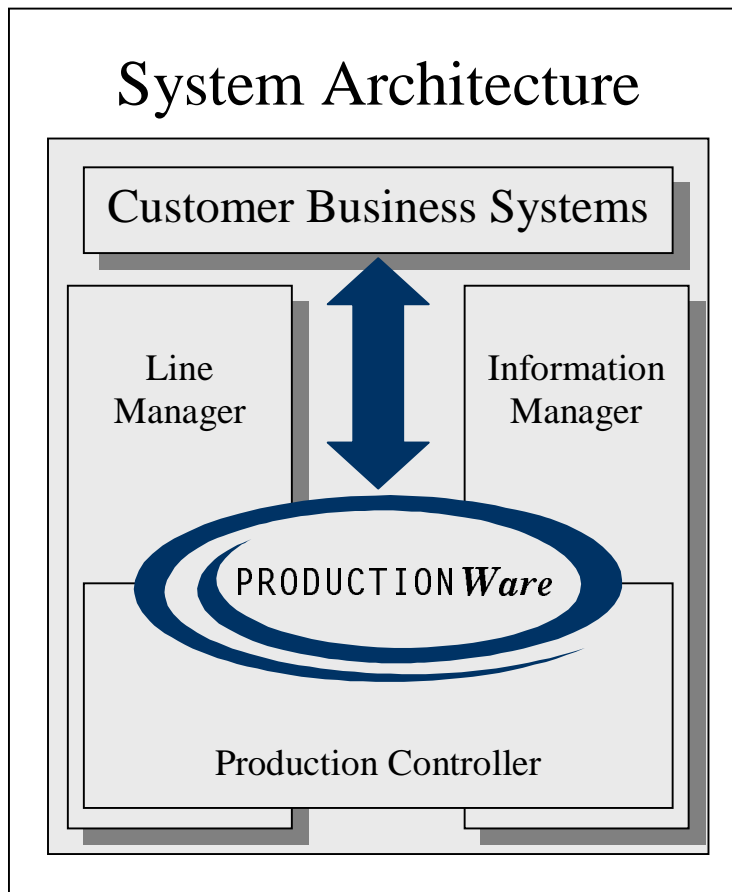

What are your biggest production challenges?

The issues you face may be different than those of other manufacturers, and they may even be different from plant-to-plant within your own company. That's why you need a system, like ProductionWare, that is tailored to your needs and supports your goals and strategies.

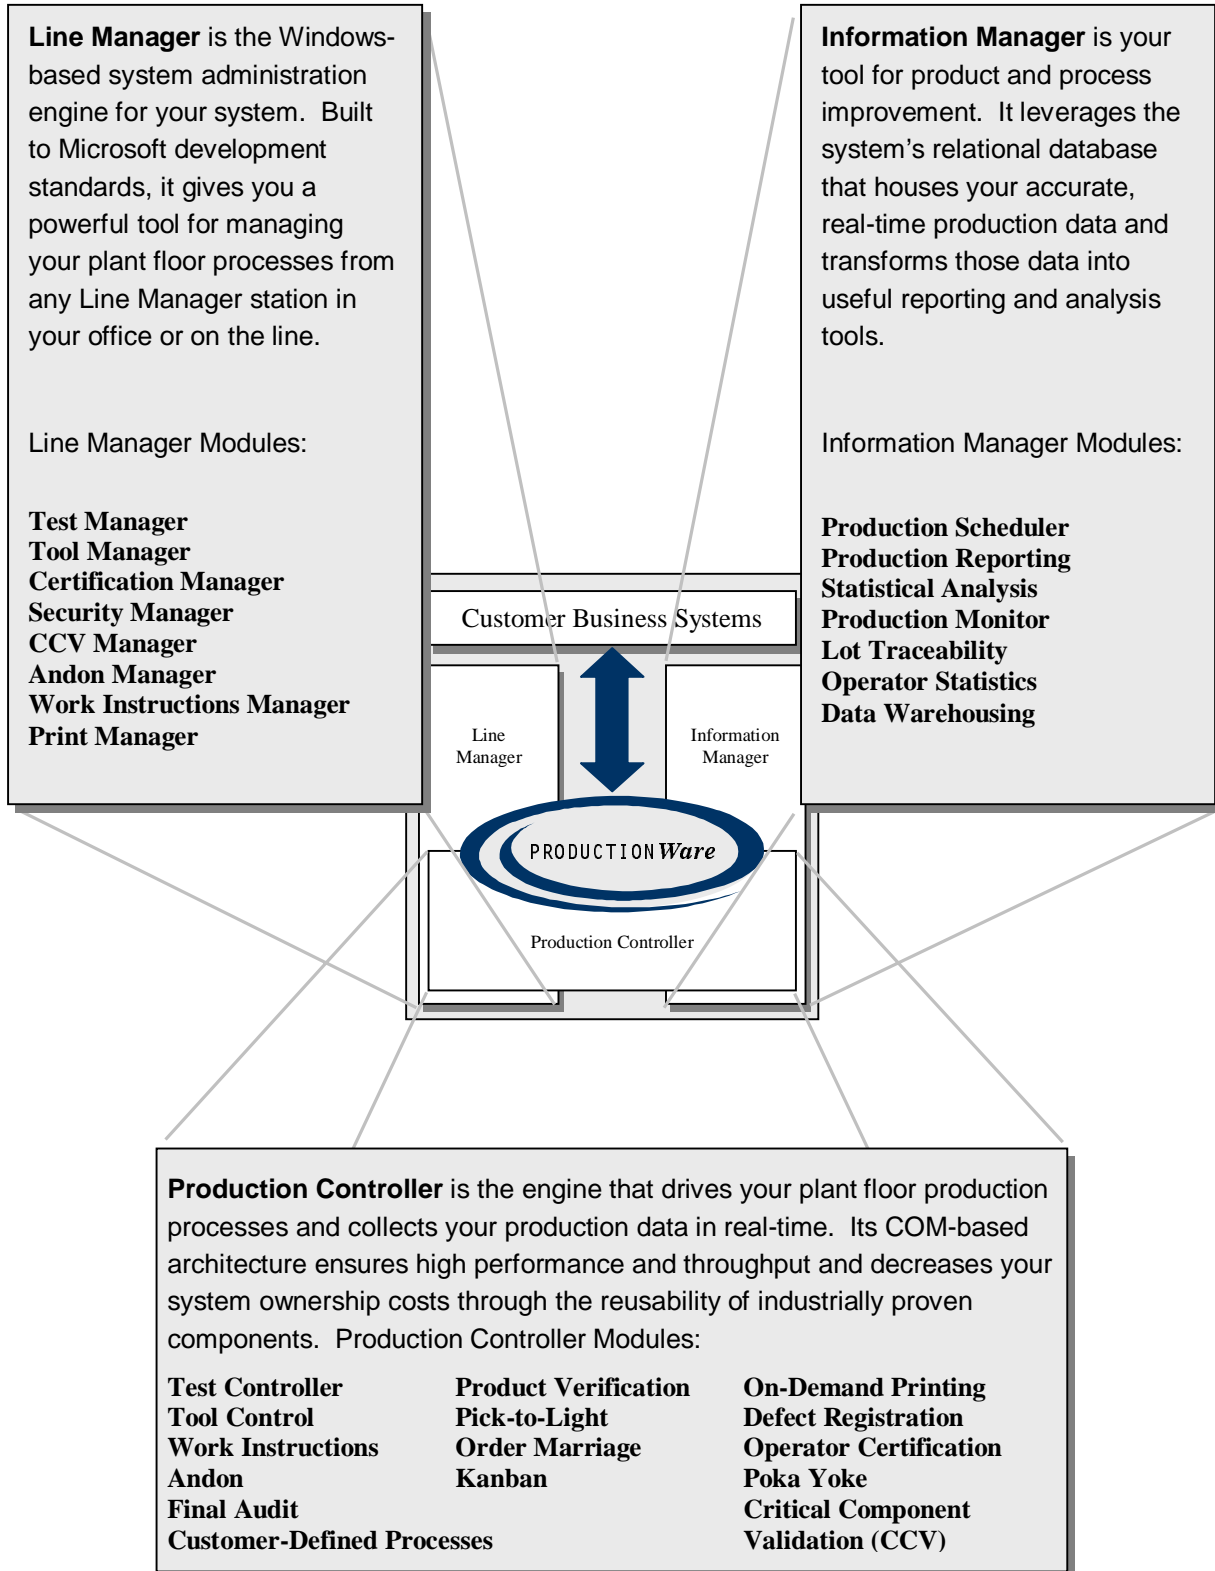

Long-Term Productivity

ProductionWare's integrated nature means you can invest in the functionality you need today without jeopardizing your long-term goals.

Additional functionality and processes can easily be integrated to your system as your products, processes and/or business drivers change. An investment in ProductionWare today is an investment in productivity for years to come.

PRODUCTION Ware Functional Model

*Delivering on the Promises of the
Information Age*
